

## **Kimba Inline**

### **At a glance**

- Suitable for twins or siblings
- Standard width
- Foldable
- Stable
- Easily removable seat unit
- Individually adjustable

Whether you want to go for walks or take trips with twins or any two children of approximately the same size, a twin or sibling buggy will significantly facilitate your daily activities. Our Inline mobility base proves that buggies for twins don't have to be unwieldy and cumbersome. The Inline is just as wide as other buggies, making it the perfect solution for your space problems.

### **Outstanding driving comfort**

Thanks to the Inline mobility base, travelling with your twins has never been easier. In just a few easy steps, you can mount the Kimba seat units on the lower chassis or remove and install them on the practical Kimba Indoor Chassis for home use. The automatic quick-lock means you can be ready to go in just a few seconds. And of course the buggy can be folded to a compact size for easy home storage or transportation in a vehicle. The buggy features puncture-resistant tires and is also easy to push and steer.

As an especially practical feature, you can freely adjust the distance between the seat units to accommodate children's body sizes. Thanks to the multifunctional Kimba seat units with washable covers, your child is always in the physiologically correct position and has optimum support. Seat depth and width as well as back height can be individually adjusted. You can also adjust the knee angle and height of the foot rest to give your child optimum sitting comfort. The Inline mobility base can also be equipped with an oxygen unit or transport case in place of the second seat.

The proven Kimba Spring rehab buggy and the three-wheel Kimba Cross mobility base are also available for use with the Kimba seat unit.
