

# TGA *Active Walker*

The Active Walker is a revolutionary design which takes the function and looks of a simple walking aid to a new level. Designed in Scandinavia it has just been awarded the 2007 award for design excellence. A simple lever arrangement allows handle and seat height adjustment in seconds to suit any user. Large wheels make it easier to tackle more uneven terrain and the spacious, stable frame design allows you full movement and a better stride.

- Maximum user weight is 125kg
- Only weighs 8.9kg
- Easily adjustable for handle and seat height
- Large front wheels for excellent mobility
- Reassuringly stable and easy to use
- Lightweight frame that folds incredibly easily
- Large grip handles with lockable brakes

*"The Active Walker combines all the best user-friendly features in a modern, lightweight and sleek design - you won't find better!"*
